

A GUIDE TO "BEAT THAT"

"Beat That" has been designed to help children become fluent with their number bonds and table facts.

Here is a guide to using the "Beat That" materials at home:

- There are 6 challenges. Each challenge is at a different level.
- Levels: Rec - P1; Y1 - P2; Y2 - P3; Y3 - P4; Y4 - P5; Y5/6 - P6/7
- To get warmed up, it might be worth using the level below your child's stage, e.g. if your child is in P3, start with Y1 instead of Y2.
- Practise the number bonds and/or table facts for your child's level without a time-limit. Mix them up so they are in a different order.
- You do not have to practise all of the table facts/number bonds for a level in one go, choose a few to focus on at a time.
- If you would like to introduce a time-limit, start by timing how long it takes your child to complete a challenge then make it a target to beat their own time the next time.
